

Congratulations on taking your first step on a wonderful and rewarding journey! Welcome to Pants!

This instructional brochure is to introduce you to...

THE WORLD OF PANTS!

There are many different kinds of pants! Here are just a few:

- corduroys
- blue jeans
- slacks
- capris
- sweat pants
- pantaloons
- parachute pants
- lederhosen

But don't let that intimidate you. All pants have many characteristics in common!

How many holes?

Pants typically have one large hole and two smaller holes. These are for your waist and feet, respectively.

Look around. Somebody next to you may be wearing pants! Notice how their legs fit into their pants.

Some pants may have more than three holes. These pants are either "fashionable" or old. Or both!

Fastening your pants

Be sure to keep the fastening device to the front of you. This is often a zipper and a button. Take care when fastening and make sure all of you is inside before zipping or buttoning. This can be a painful mistake!

Size matters!

As a beginner, it is okay if your pants do not fit very well. This takes practice!

The more you wear pants, the more you will learn to avoid pants that are too tight for comfort or that regularly fall to your ankles.

You may find it helpful to wear a belt. Some people wear belts even when their pants already fit!

Pockets are useful for storing small items

- wallet
- mobile phone
- keys
- Tamagotchi

Pockets can also warm up your hands if they get a little chilly.

Final tips

- Be sure to put your shoes on **AFTER** you put on your pants.
- Pants do not make suitable shirts or jackets.
- Do not attempt to use pants as safety flotation devices. Most sink in water.

Good luck! If you wish to learn more about pants, ask a ProPants representative for more information.
